

Ohio Valley Door

Manufacturers of Architectural Wood Doors

## A Tradition of Excellence

In today's design and construction environment, Ohio Valley Door is something of an anomaly.

Our process still involves an experienced team of craftsmen at each stage, ensuring that every door we build meets the exacting standards to which we have held ourselves since 1972.

And by strategically integrating technology into that process, we fulfill orders under even the tightest deadlines — without sacrificing the precision and quality that are the hallmarks of our brand.

Whether you need custom doors manufactured to your specifications, or simply have a short timeline and an insistence on quality, we promise to exceed your expectations.

*Gerald Brewer, Jr.*

For decades, Ohio Valley Door has continued to earn the loyalty of our customers, including architects, builders and specifiers who know that when they order an Ohio Valley Door, they have the assurance of a quality product with service to support every sale. As a result, our doors can be found in offices, hospitals, schools, businesses - virtually any type of commercial building.

Attention to detail marks every stage of production. Careful inspection of grain and color is conducted before selecting each veneer. Doors are machined to exact tolerances to minimize telegraphing. Doors and panels are carefully sanded before shipping. Custom finishing is available on all Ohio Valley Door products.

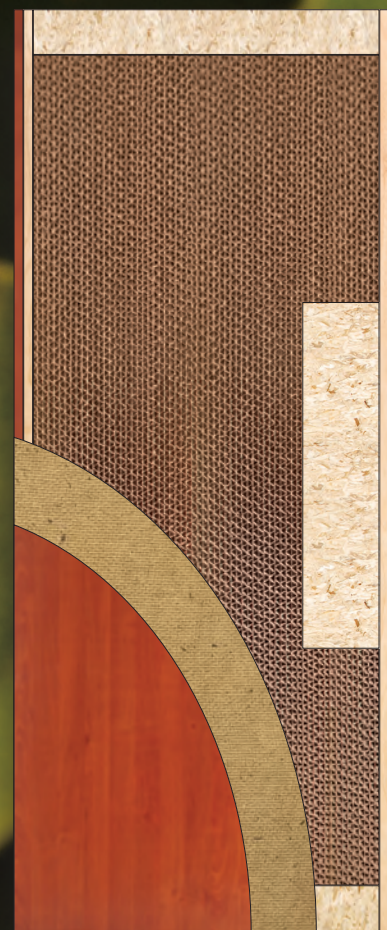

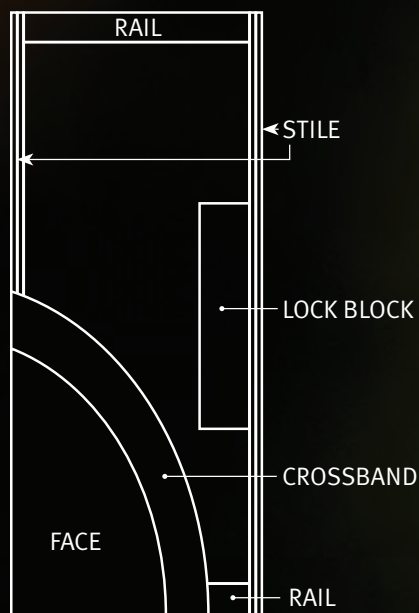

Manufactured to your specifications, our doors are available pre-fit, pre-machined and prefinished. We also offer architectural blueprint matched paneling to match our doors, or for any environment where fine paneling is specified.

In addition, we excel at crafting special application doors such as wicket doors, dutch doors, lead-lined doors and panels with custom design features. If you have a requirement that demands unique design and fabrication, Ohio Valley Door is up to the task.

# Doors & Panels

Ohio Valley Door possesses the technology, the expertise and the resources to meet every need.

We're recognized experts in unique design and fabrication, with pre-fit, pre-machined and pre-finished options for a variety of architectural applications.

Wicket doors, dutch doors and lead-lined doors are available upon request, as is architectural paneling to match doors or fulfill any specified fine paneling requirement.

## A Greener Way to Work

At Ohio Valley Door, we believe that sound environmental practices can lead to a more sustainable future. This drives us to seek out greener ways to work, from the materials we select, many of which are composed of recycled or repurposed materials, to the processes we use in manufacturing, which reduce waste and decrease our impact on the environment.

**Quality** Our products are manufactured using only the finest materials and proven manufacturing methods. Our stringent quality control procedures ensure that our products always comply with industry standards.

**Flexibility** No matter your project's size and difficulty, no one in the industry can match our ability to quickly produce special orders to a wide variety of specifications.

**Service** You won't wait months for your order. We typically deliver custom-made doors in two to four weeks and stock doors in a matter of days. We are centrally located in the heart of the wood industry, with easy access to suppliers, and can ship anywhere, quickly and efficiently.

*“Every door we build meets the exacting standards to which we have held ourselves since 1972.”*
